

Assembling Whoopee Deux and Whoopee Un for the Bike Friday Haul-a-Day Elite & Ever-e-Day

(December 2023 version)

Items:

2 – 23 inch tubes (for Haul-a-Day & Ever-e-Day)
2 – 23 inch (Haul-a-Day) or 20 inch (Ever-e-Day) tubes

2 - Pair of braces (1- L & 1- R)

Bar Tape

Hardware provided:

Qty 2 – M6x12 SS BHCS

Qty 2 – M6x25 SS BHCS

Qty 4 – M6 SS Nyloc Nut

Qty 4 – M6x20 SS SHCS

1.

Haul-a-Day

Take off rack top plate, then install braces as shown under the rack top plate.

Tighten the bolts until they are finger-tight.

Notice direction of the plate/feet. The Ever-e-Day has the front braces turned back to give 3 inches more clearance for bike rider's legs.

Ever-e-Day

2.

Install (23 inch for HaD, 20 inch for EVD) tubes in front and back of rear rack. The tubes should have 1 inch showing outside of the clamp.

Whoopee Un is 1 - 23" tube and 2 side braces in the front.

3.

Haul-a-Day

Install 23 inch tubes on either side of the rear rack.

Ever-e-Day

3" Larger

4.

Tighten all the bolts (5-7nm)

5.

Finish by adding handle bar tape (included) over the 4 silver tubes or padding of your choice.
